

Ian Duhamel

Full-Stack Javascript Developer

Porto Alegre, RS | ianduhamelh@gmail.com | [Linkedin](#) | [Github](#)

About Me

Enthusiastic developer with over 2 years of experience, dedicated to simplifying complex ideas. I love building innovative tools and am always eager to learn. Committed to community contribution, I maintain a blog sharing tech insights. Continuously seeking growth, I adapt easily to diverse projects and challenges

Work Experience

Hashi - Tech Lead

Mar. 24 / Nowadays

In my current role, in addition to my responsibilities as the principal developer, I coordinate with the development team, gather client requirements, and ensure our technical solutions align with their needs. I oversee the project's technical direction, mentor developers, ensure code quality, and integrate customer feedback into product development. The company now has a B2B focus, and we are incorporating AI and business-oriented analytics into our products to match market trends.

Hashi - Javascript Developer

Mar. 23 / Mar. 24

As a Javascript developer I worked mostly on updating and maintaining the company B2C platform, a Multitenant Next.js 12 project trying to stay the most as possible on SSR. Also I took a key role on being the main dev on the first prototype of our React Native library (the one that now I'm developing with a team after my promotion)

Bookster - React Native Developer

Sept. 23 / Nov. 23 (3 mo. Freelance)

As a freelancer on Bookster, a book app that is on both Play Store and App Store with more than 300k downloads. I led the integration of Amplitude Analytics on their React-Native project. This opportunity allowed me to improve my understanding of user behavior, enhancing the app's usability and engagement.

Jethi Tech - JavaScript Developer Intern

Oct. 22 / Mar. 23

During my internship at Jethi Tech Software, an international digital marketing company, I collaborated with successful startups on their digital growth. My role as a Frontend React Developer involved using various UI libraries to create responsive designs and integrating GraphQL APIs using Apollo Client on the frontend.

Leadership & Involvements

Devink - Co-Founder & CTO

Aug. 23 / Nowadays

As the CTO of Devink, I guide our technological vision across diverse projects, including client-specific solutions and our own SaaS products. Devink, founded to solidify the freelance work of our founding team, specializes in development and technical solutions.

Projects

[Shorkit - Free URL Shortener tool](#)

May. 24

Shorkit is a newly launched project designed to provide a free URL shortening service to the public. Built with Next.js for full-stack development and Supabase for database management and authentication, Shorkit features OAuth integration for easy sign-in and a user-friendly dashboard for managing links.

Skills & Interests

Languages:

- English: Professional
- Portuguese: Intermediate
- Spanish: Native

Top Tech Skills:

- Javascript
- Typescript
- Next.js
- React
- Node.js
- Express
- Supabase
- PostgreSQL
- Strapi
- MongoDB / Realm
- Redis
- Docker
- Git / Github
- React Query
- CSS / Tailwind CSS
- MUI / ShadCN
- Posthog
- Amplitude Analytics
- Google Ads
- FB Pixel
- React-Native
- OpenAI API
- Linux
- IOS

Hobbies:

- Basketball
- Gym (Weightlifting)
- Play Video Games
- Travel around the World
- Blogging
